

Wingsuit Selector:

With a full line up of 6 different wingsuits you are sure to find a suit that fits your needs!

How many wingsuit jumps do you have?

0 – 5
Beginner

5 – 50
Intermediate

50 – 100+
Experienced

Prodigy

Phantom

Acro

Ghost

Stealth

Vampire

The **Prodigy** was designed with new wingsuit pilots in mind. Its new two-piece wing concept means the suit is incredibly easy to assemble, wear and fly.

The **Phantom** is an “all around” wingsuit designed with flocking and progressing pilots in mind. The suit is docile in the flock but is surprisingly powerful at break off.

The **Acro** has been specifically developed for pilots interested in acrobatics and freestyle flying. The suit design combined with the body position greatly enhances the suits manoeuvrability.

The **Ghost** wingsuit is aimed at advanced wingsuit pilots who want a higher performance suit for flocking, back flying and all around fun flying.

The **Stealth** is aimed at experienced wingsuit skydivers who want to access a new level of performance. The large wing surface means incredibly slow freefall speeds and unmatched range for flocking. **(MINIMUM 75 jumps!)**

The **Vampire** is a high performance suit optimized for glide distance. High forward speed and precise control have helped make the Vampire the weapon of choice amongst experienced BASE wingsuit pilots.
